EHR Your Way - Real World Testing Results - 2025

Developer Name: Adaptamed, LLC

Product Name: EHR Your Way

Version Number: 9.2.0.0

Product List (CHPL) ID: 15.02.05.1042.ADAP.01.01.0.211220

Plan Report ID: 20241024ada

Developer Real World Testing Plan Page URL: **https://www.ehryourway.com/real-world-testing**

Developer Real World Testing Results Report Page URL [if different from above]: Same as above

Summary of Testing Methods and Key Findings:

All the measures are tested based on the data logs in from our production servers. Based on the logs we analyzed the required denominator and numerator counts of the listed measures below.

Crieteria ID	Description
170.315(g)(9)	Application access - all data request
170.315(g)(7)	Application access - patient selection
170.315(g)(10)	Standardized API for patient and population services

It is observed all the required functionalities are working as expected and no nonconformities were observed after analysing the data logs.

EHR Your Way - Real World Testing Results - 2025

Standards Updates: None of my products include these voluntary updates.

Changes to Test Plan: No changes made to the test plan.

Key Milestones:

Briefing about the test plan and execution process: 05/30/2025 Data logs

Criteria ID	Description	Dates to capture the Data logs for Monitoring	Duration
170.315(g)(9)	Application access - all data request	02/01/2025 to 05/30/2025	
170.315(g)(7)	Application access - patient selection		4 Months
170.315(g)(10)	Standardized API for patient and population services	02/01/2025 to 05/30/2025	4 Months

Care Settings: Internal Medication, GI, OBGYN, Pediatrics, Psychiatric and Cardiology settings

Status: MET

EHR Your Way - Real World Testing Results - 2025

Measure #1: Associated Criteria ID: 170.315(g)(9): Application access - all data request

Metrics and Outcomes

Measurement/Metric:

The total percentage of successful transmissions.

Denominator = (Total no. of requests for All Patient Data – Total no. of Invalid API requests)

Numerator = Total no. of successful responses given to requests in Denominator

Total % of Successful Transmissions = (Numerator/Denominator) X 100

Description: The data required for the Measure is collected for the duration of 4 months as mentioned in the schedule. Using the data logs we will collect below (a – f) mentioned data to calculate the accuracy and successful transmission percentage. This Criterion required EHR Your Way to give the functionality to users for requesting All patient Data as mentioned in §170.315(g)(9)(i)(A). The API data requests are considered valid and response is given only if the combination of User name, password and API Token key are correct.

a) Total no. of API requests received for All patient Data.
b) Total no. of API invalid requests
c) Total no. of API responses from EHR Your Way.
d) Total no. of API responses failed due to Recipients network or other technical issues.
e) Total no. of API Responses failed due to EHR Your Way network or technical or improper message standards issues.
f) Total no. of API responses failed due to Nonstandard data entry by users.

Relied Upon Software: NA

Outcomes: Total % of successfully transmissions.

Denominator = (95 – 4) = 91

Numerator = 91

Total % of Successful Transmissions = (91/91) X 100 =100%

The Denominator outcome reflects our ability to identify and appropriately respond to invalid requests with error messages. The Numerator count captures the total number of valid requests that were successfully processed and responded to as expected.

We are pleased to report that all milestones were successfully met as outlined.

EHR Your Way - Real World Testing Results - 2025

Key Milestones, Date/Timeframe:

Data log monitoring Schedule: 02/01/2025 12.00 AM (PST) to 05/30/2025 11.59 PM (PST)

Data Analysis Schedule: 05/31/2025 to 06/02/2025

Result Reporting Schedule: 06/09/2025

Care Setting: Internal Medicine, GI, OBGYN, Pediatrics, Psychiatric and Cardiology settings

---

Measure #2: Associated Criteria ID: 170.315(g)(7): Application access - patient selection

Metrics and Outcomes:

Measurement/Metric:

 The total percentage of successful matching responses

Denominator = (Total no. of requests for All Patient Data along with username and an API token – Total no. of invalid API requests)

Numerator = Total no. of successful matching responses given to requests in Denominator

Total % of Successful Transmissions = (Numerator/Denominator) X 100

Description: The data required for the measure is collected for the duration of 4 months as mentioned in the schedule. Using the data logs we collect information as mentioned below to calculate the accuracy and successful responses percentage. Using these logs we can monitor if EHR Your Way is able to accept the username and password and API key which belongs to a specific patient and give data of a patient who has the same user name mentioned in the health IT data base. This would satisfy the functional requirement mentioned in the (g)(7)(i).

a) Total no. of API requests received for the patients.
b) Total no. of invalid API requests for the patients.
c) Total no. of successful API responses from EHR Your Way.

Relied Upon Software: NA

Outcomes: Total % of successfully transmissions.

Denominator = (118 – 6) = 112

Numerator = 112

EHR Your Way - Real World Testing Results - 2025

Total % of Successful Data Category Transmissions = (112/112) X 100 = 100 %

All data logs for the API indicate successful transmission, while invalid or unauthorized requests are appropriately denied.

We are pleased to confirm that all milestones have been successfully met as outlined.

Standards Update: Not Applicable

Key Milestones, Date/Timeframe:

Data log monitoring Schedule: 02/01/2025 12.00 AM (PST) to 05/30/2025 11.59 PM (PST)

Data Analysis Schedule: 05/31/2025 to 06/02/2025

Result Reporting Schedule: 06/09/2025

Care Setting: Internal Medicine, GI, OBGYN, Pediatrics, Psychiatric and Cardiology settings

---

Measure # 3: Associated Criteria ID: 170.315(g)(10) Standardized API for patient and population services

Measure: Total percentage of successful responses given to API requests.

Denominator: Total no. of Successful API requests from Client Applications.

Denominator Exclusion: Total no.of invalid API requests from Client Applications. This includes the requests with wrong passwords or invalid OAuth Tokens. Numerator: Total no. of successful responses from EHR Your Way

Total %: [Total no. of Successful API requests from Client Applications - Total no. of invalid

API requests from Client Applications. / Total no. of successful responses from EHR Your Way]

* 100

Description: The data logs of API requests and responses are collected during the data logging schedule of 4 months. This data will prove that EHR has the real time working modules to receive and respond to API requests in FHIR format.

Outcomes:

Total percentage of successful responses given to API requests = [176/(183-7)]*100 = 100%

The outcome proves that EHR has the real time working modules to receive and respond to API requests in FHIR format.

We are pleased to report that all milestones were successfully met as outlined.
